

"A Dream of Every Farmer"

GOBIND

MULTICROP THRESHER

MULTICROP THRESHER

The crops like Red gram, Mustard, Sorghum Soyabean, Wheat, Millets etc, can be threshed with this thresher as it is designed with latest technology.

Double Speed System

This Special Provision is made to control the higher strike of threshing rotor to avoid any breakage of grain during threshing. RPM of threshing drum and suction blower can be increased or decreased as and when required mentioned as under:

Threshing drum 500 to 720 RPM

Suction Blower 750 to 950 RPM

- ◆ Threshing rotor & double speed system duly balanced by Computerised System.
- ◆ 50 % more output than other threshers.

TRIPLE ACTION

More output: Clean grain, No breakage of grain

- ◆ More benefit with lesser fuel consumption and minimum load on tractor.
- ◆ Fully safe with automatic self feed.
- ◆ Prompt after sale service and easily availability of spare parts.

SPECIFICATION

Length x Width x Height	267 X 115 X 155
Weight	1125
Tractor (Engine H.P)	35 & Above
Thresher Cylinder	
Type	Spike Tooth Open Cylinder
Length(cm)	67
Diameter (cm)	75
Cleaning System	Centrifugal Blower & Oscillating Screen

Performance (Multicrop)

Wheat, Blackgram	0.7 to 0.8
Beans, Soyabean, Jawar	.09 to 1.0
Millet, Bajra	1.2 to 1.5

Thermal Efficiency %

Over 99

Cleaning %

More than 97

Breakage %

Less than 2

Total Losses %

Less than 4
